- NKMA
- VACC
- OD 20/30
- Glare 20/400
- OS 20/25
- Glare 20/100

The patient

Case

48 YO HF

-
-
- Minnesota
- Relocated to Phoenix, I assume care
- Untreated peak IOP
 -
 -

48 YO HF Treatment History

- Initial therapy Timolol 0.5%
 -
 -
- Current Medical Regimen:
 - Xalatan ou qPm x 2 yrs

48 YO HF

- Since starting Xalatan IOP readings:
 - OD=17-19mm Hg
 - OS=18-20mm Hg
- Previous doctor felt that patient was being “safely” treated at this IOP level.

Case

I am seeing RED

Red Eye Day
